

CONFERENCE OF THE RESEARCH INSTITUTE SOCIAL COHESION (RISC)
12 to 13 October 2023 in Hanover, Germany

Bridging the Divide: Exploring the Local in Social Cohesion

While social cohesion is often conceptualized at a macro level, it is rooted in subjective feelings of belonging that are mainly experienced and established in individuals' locally-oriented social environments. Social cohesion encompasses the ties that exist between and within local communities, extending beyond bonds in particular groups.
